- Shipping production-grade backend systems and integrations end-to-end across multiple live SaaS products.
- Expanding SaaS integration reach to thousands of tool combinations via Google app verification and Zapier marketplace listings.
- Driving measurable outcomes through software, including a 10% sales productivity increase across 3 active companies.

SKILLS

- **Technical Skills:** AWS, CI/CD Pipelines, Docker, Elixir, Git, GitHub, Google Cloud Platform, GraphQL, JavaScript, Kubernetes, Linux, Microsoft Azure, MongoDB, PostgreSQL, React, Redis, RESTful API, SQL, Unix

WORK EXPERIENCE

Favored Company

March 2025 - Present

A software agency delivering client-driven SaaS products across multiple engagements and clients.

Full Stack Software Engineer • Full-time

Owning end-to-end delivery from architecture through production deployment across multiple client products.

- Built and shipped HypedBoards solo from zero to production, a real-time gamified leaderboard platform using Phoenix PubSub and LiveView, delivering a measurable 10% sales productivity increase for the first client and growing to 3 active companies.
- Extended HypedBoards with a direct HubSpot integration and a public Zapier marketplace app exposing 3 triggers, giving users automatic score updates from their existing toolchain without manual entry.
- Implemented Gmail integration in Lifted Work with real-time sync via Google Cloud Pub/Sub, OAuth 2.0 from scratch, and encrypted token storage, replacing a tab-switching workflow for 3 pilot agencies.
- Built an AI chatbot tool layer in Lifted Work backed by OpenAI function calling, grounding natural-language queries in live data across Google Analytics, Search Console, and Google Ads through normalized, per-API tool modules.
- **Skills:** Elixir, Ash Framework, Phoenix LiveView, JavaScript, PostgreSQL, OpenAI API, Google Cloud APIs, Fly.io

OnSpace Technologies

May 2023 - April 2025

A field operations and data collection SaaS platform serving multiple companies.

Backend Software Engineer and Integrations Manager • Full-time

Owning the core GraphQL API, production infrastructure, and third-party integration layer end-to-end.

- Published OnSpace as a public Zapier marketplace app, going through the full review and listing process, and exposing 3 triggers that connected OnSpace to thousands of third-party tools without per-integration engineering work.
- Built the full backend of an internal workflow automation engine supporting OAuth 2.0 connections to Slack, Gmail, Outlook, and Google Calendar, eliminating the need for a separate Zapier account.
- Built a GPS-based spatial feature on PostGIS, enabling land area and perimeter calculation from walked GPS coordinates and a geofencing layer that enforces location-based form submission rules at the backend level.
- **Skills:** Elixir, GraphQL, PostgreSQL, PostGIS, Microsoft Azure, AWS, Slack API, Gmail API, Outlook API, Google Calendar API

VOLUNTEERING & LEADERSHIP

Global Spark

May 2023 - May 2024

Full Stack Development Lead

Led a full website rebuild using React and Tailwind CSS, improving performance, accessibility, and interface consistency.

Skills: Node.js, Firebase, React, JavaScript

EDUCATION

Bachelor of Science in Computer Science

Jomo Kenyatta University Of Agriculture And Technology

CERTIFICATIONS

Full Stack Software Engineering

February 2022 - November 2023

ALX Africa
