Full-stack engineer with 3+ years building production SaaS systems, third-party integrations, and real-time features. Experienced across the full backend-to-frontend stack with a track record of shipping reliable, scalable systems.

SKILLS

- **Technical Skills:** Ash Framework, AWS (S3), CI/CD Pipelines, Docker, Elixir, Functional Programming, Git, GitHub, Google Cloud Platform, GraphQL, JavaScript, Kubernetes, Linux, Microsoft Azure, Phoenix Liveview, PostgreSQL, Redis, RESTful API, SQL, Unix
- **Soft Skills:** Analytical thinking, attention to detail, effective communicator, quick learner, results-oriented, self-motivation, strong problem-solving

WORK EXPERIENCE

Favored Company

March 2025 - Present

Full Stack Engineer • Full-time

Technologies: Elixir • PostgreSQL • Phoenix LiveView • Ash Framework

- Engineered secure integrations with Gmail API, Google Analytics, and Google Search Console, in **Lifted Work**, covering OAuth scope management, webhook authentication, and background job processing for data sync and reporting.
- Integrated an AI assistant into **Lifted Work** using OpenAI and Anthropic LLMs, enabling users to query Google Analytics and Search Console data conversationally and surface client insights without leaving the platform.
- Architected and built **HypedBoards**, a real-time, gamified leaderboard platform using Phoenix LiveView, designed to drive productivity and team engagement across departments.
- Extended **HypedBoards** with a HubSpot integration, enabling real-time data sync and streamlined user onboarding via quick sign-up flows.
- Resolved critical production bugs and maintenance issues based on client feedback, improving system stability by 20%.

OnSpace Technologies

May 2023 - April 2025

Backend Software Engineer • Full-time

Technologies: Elixir • PostgreSQL • Azure • AWS • Git

- Led backend integration of OnSpace with Zapier as integrations manager, enabling users to automate workflows through third-party app connections and driving a 15% increase in user traffic.
- Designed and shipped an internal workflow automation tool that increased new user signups by 15% and reduced operational workload for existing users.
- Maintained 99.99% system uptime through test-driven development practices and proactive monitoring.
- Reduced deployment-related incidents by adopting canary release strategies and gradual rollout pipelines, improving overall release reliability.
- Built and maintained scalable backend services and GraphQL API endpoints for the OnSpace mobile app using Elixir, AWS S3, Azure PostgreSQL, Docker, and Container Registry, and optimized for high request volumes.

VOLUNTEERING & LEADERSHIP

Global Spark

May 2023 - May 2024

Full Stack Development Lead

- Spearheaded a complete revamp of the Global Spark website and Hack the Globe hacker dashboard, leveraging React and Firebase, improving performance, and increasing user engagement by 20%.
- Collaborated with designers to implement new features, enhancing user experience and interface consistency, and improving retention and satisfaction.
- Led end-to-end development of multiple Global Spark products, delivering scalable, maintainable solutions that boosted platform performance by 10%.

EDUCATION

Bachelor of Science in Computer Science

Jomo Kenyatta University Of Agriculture And Technology

Relevant Coursework: Cryptography, Cybersecurity, Machine Learning, Distributed Systems, Data Structures, System Analysis, Database Management.
